

Experienced Area Manager/Agronomist

North Midlands Region

Summit Fertilizers is a highly successful WA based company that is recognised as a major supplier of quality fertilizers and related services to farmers.

Summit has an innovative 'can do' culture, a unique range of branded fertilizers, patented manufacturing processes, five regional depots and a distribution network comprising trained agents and agronomists.

Based in the North Midlands region your role will focus on developing strong customer relationships and providing practical soil fertility and plant nutrition solutions for broad acre farmers.

You should be comfortable working autonomously and as part of a sales team. You will need a strong understanding of rural issues and be able to demonstrate an affinity and empathy with rural customers. A tertiary qualification in Agriculture would be highly regarded.

Summit Fertilizers offers the opportunity to work within a professional and dynamic environment with excellent training and development incentives and very attractive remuneration packages for performance orientated professionals.
